

EXP NO 21: Create a SQL storage service and perform a basic query using any Public Cloud Service Provider (Azure/GCP/AWS) to demonstrate Database as a Service (DaaS) using Azure.

AIM:

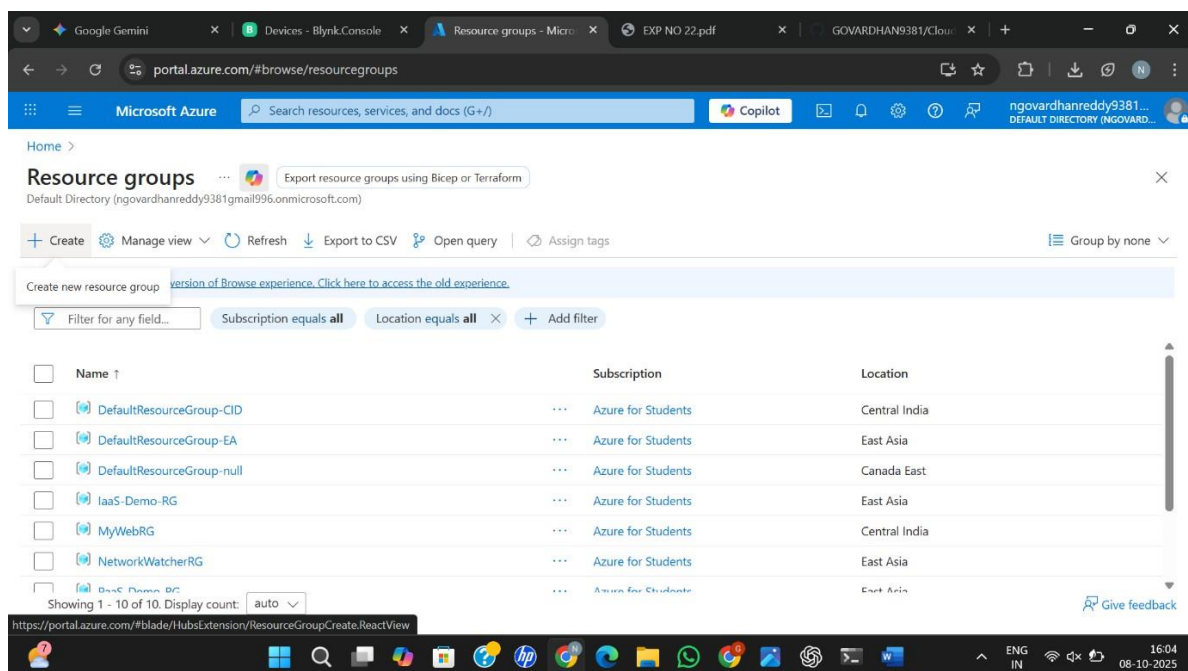

Create a SQL storage service and perform a basic query using any Public Cloud Service Provider (Azure/GCP/AWS) to demonstrate Database as a Service (DaaS) using Azure.

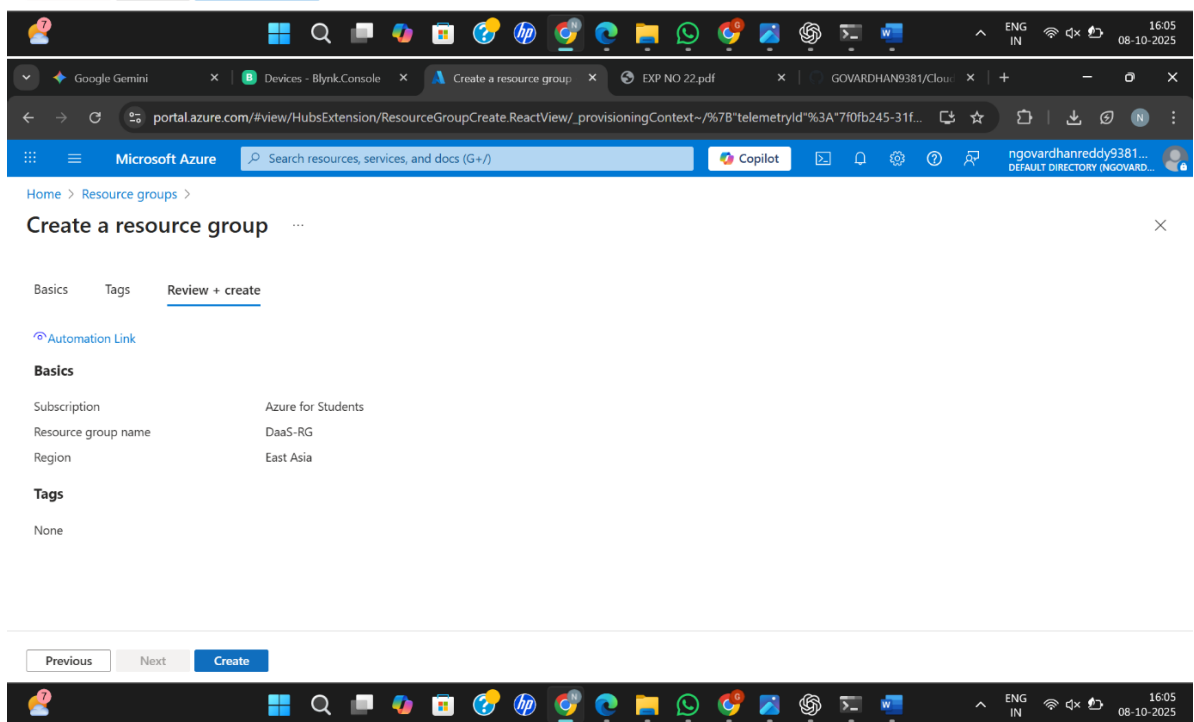

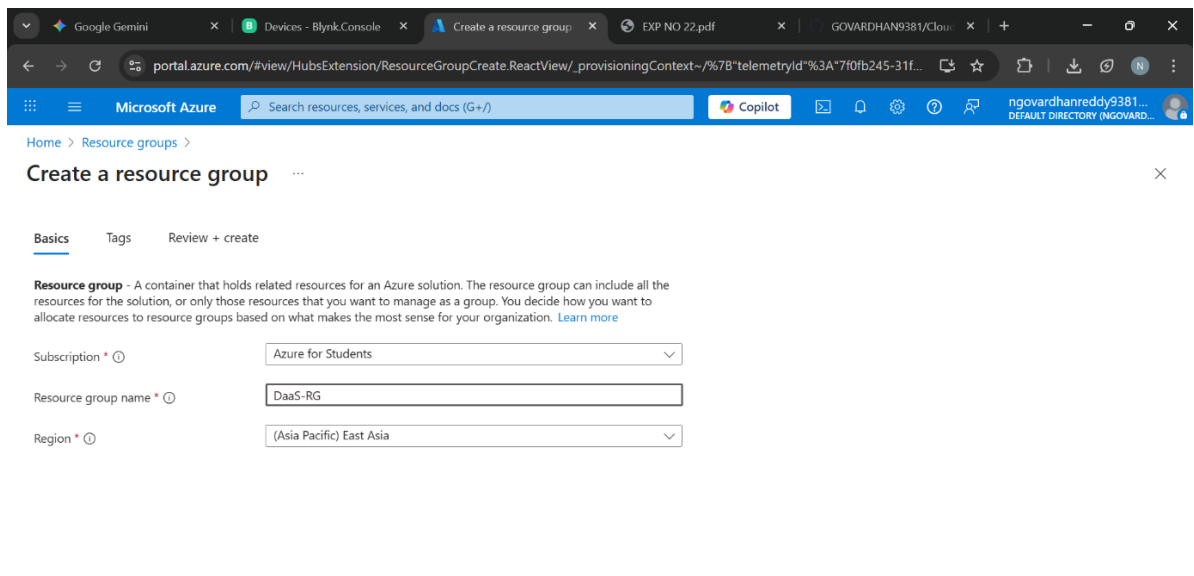

Procedure:

Procedure:

1. Log in to Azure Portal.
2. Create a SQL Database → Select Use existing data → Sample (AdventureWorksLT).
3. Open Query Editor → Sign in with credentials.
4. Run the SQL query to join tables SalesLT.ProductCategory and SalesLT.Product.
5. View the result showing product categories and product names.

Design:

Microsoft Azure portal showing Resource groups. The page displays a list of resource groups under the subscription 'Azure for Students'. The table shows columns for Name, Subscription, and Location.

Name	Subscription	Location
DaaS-RG	Azure for Students	East Asia
DefaultResourceGroup-CID	Azure for Students	Central India
DefaultResourceGroup-EA	Azure for Students	East Asia
DefaultResourceGroup-null	Azure for Students	Canada East
IaaS-Demo-RG	Azure for Students	East Asia
MyWebRG	Azure for Students	Central India

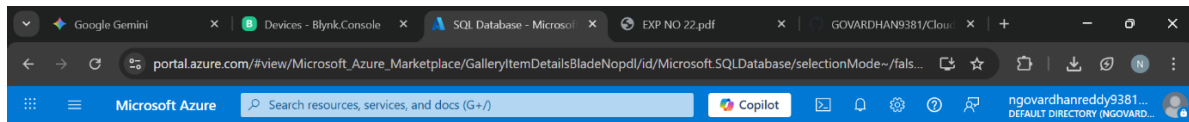

Showing 1 - 10 of 11. Display count: auto

Microsoft Azure portal showing Marketplace. The page displays a search for 'database' with filters for Pricing, Operating System, Publisher Type, and Product Type. A notification banner indicates 'Private Offers are now here'.

Search results for 'database' include:

- Oracle Database 19c
- Oracle Database 19c
- Azure Database for MySQL
- Azure Database for MariaDB

Notification: Private Offers are now here. Private Offers have moved. To see your private offers, go to Private Offer management on the left menu.

Microsoft Azure portal showing the configuration for a new SQL Database resource. The configuration includes:

- Subscription: Azure for Students
- Resource group: Daa5-RG
- Region: East Asia
- Database name: mydaasdemo
- Server: (new) mydaasserver123
- Authentication method: Microsoft Entra-only authentication
- Microsoft Entra Admin: ngovardhanreddy9381@gmail.com#EXT#@ngovardhanreddy9381gmail996.onmicrosoft.com
- Compute + storage: General Purpose: Standard-series (Gen5), 2 vCores, 32 GB storage, zone redundant disabled
- Backup storage redundancy: Geo-redundant backup storage

Estimated cost / month: 484.26 USD

Networking: Allow Azure services and resources to access this server. No

Microsoft Azure portal showing the Overview page for the SQL database 'mydaasdemo (mydaasserver123/mydaasdemo)'. The page displays various settings and options:

- Search bar and navigation icons (Copy, Restore, Export, Set server firewall, Delete, Connect with..., Feedback).
- Overview section with a search bar and a list of actions: Activity log, Tags, Diagnose and solve problems, Query editor (preview), Mirror database in Fabric (preview), Resource visualizer, Settings, Data management, Integrations, Power Platform, Security.
- Essentials section with a list of properties: Resource group (move), Daa5-RG, Status (Online), Location (East Asia), Subscription (move), Azure for Students, Subscription ID (75e1e16e-428e-4402-84c9-4163a4486ab1), Tags (edit).
- Server name: mydaasserver123.database.windows.net
- Elastic pool: No elastic pool
- Connection strings: Show database connection strings
- Pricing tier: General Purpose: Gen5, 2 vCores
- Earliest restore point: No restore point available

Buttons: Show me performance metrics for this SQL database. +2, JSON View

Microsoft Azure portal interface showing the Query editor (preview) for mydaasdemo (mydaasserver123/mydaasdemo). The page includes a sidebar with navigation options like Overview, Activity log, Tags, Diagnose and solve problems, Query editor (preview), Mirror database in Fabric (preview), Resource visualizer, Settings, Data management, Integrations, Power Platform, and Security.

The main content area displays the SQL Database Query Editor welcome screen. It features a search bar, a login button, and a "New Query" button. Below these, there is a description of the Query editor (preview) and a "Welcome to SQL Database Query Editor" message.

The authentication section shows two options: SQL server authentication and Microsoft Entra authentication. The SQL server authentication fields are filled with "CloudSAd1d48228" for Login and a password field. The Microsoft Entra authentication section shows a red error message: "Reason: An instance-specific error occurred while establishing a connection to SQL Server. Connection was denied because Deny Public Network Access is set to Yes. For more information, see https://go.microsoft.com/fwlink/?linkid=2323206." and a "Continue as ngovardhanreddy9381@..." button.
